## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-11, and 13-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Daniel et al., (US 5,848,068).

As per claims 1, 2, 4-11, and 13-17, Daniel teaches a method/system of determining when a frame of information comprised of one or more data buffers of information being transmitted in a network processor (Fig. 2, 5) has completed transmission by a transmission system therein, comprising the steps of: providing a plurality of buffer control blocks, each having space for control information to link one buffer (see figure 2, item 68, col. 12, lines 14-col. 15, lines 1-19, col. 29, lines 15-col. 30, lines 1-65) to another for transmitting information in each data buffer, each of said buffer control blocks having a last bit flag bit having a first position wherein an additional data buffer is to be chained to a previous data buffer and a second position wherein no additional data buffer is to be chained to a previous buffer; and supplying the position of said last bit flag bit in each buffer control block to the transmission system of said network processor. (see Fig.14, 210 and column 30, lines 62 - 65).

***Allowable Subject Matter***

Claims 3 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
